Does this look familiar?

If so, you may have moderate to severe Acne Rosacea.

Center for Clinical and Cosmetic Research is currently seeking participants for a clinical research study to evaluate an investigational topical powder mixture used to treat Rosacea.

Qualified participants must have at least 15 facial inflammatory lesions (swollen red bumps).

To learn more about this study and to see if you qualify, call our team at 305-933-6716. Compensation may be provided for time and travel.
